

# Phase 5: ServiceNow Flow Designer Definition (XML Export)

**Document Type:** ServiceNow Flow Designer XML Export Definition (`sys_hub_flow`)

**Application Scope:** Global

**Target Record:** Standard Laptop Procurement Flow (`standard_laptop_task`)

**Target Version:** ServiceNow Utah / Vancouver / Washington DC / Xanadu

## 1. Overview and Import Instructions

This document provides the complete, production-validated XML export representation for the **"Standard laptop task"** Flow Designer flow.

### How to Import into ServiceNow:

1. Navigate to **System Definition > Import XML** in your ServiceNow application navigator.
2. Select the exported file `sys_hub_flow_standard_laptop_procurement.xml` and click **Upload**.
3. Alternatively, open **Process Automation > Flow Designer**, click the Options menu (:), select **Import Flow**, and choose the XML file.
4. Open the imported Flow, verify all action inputs/outputs, and click **Activate**.

## 2. Technical Metadata Specification

| Configuration Attribute | Configured Value                    | Description                                                                      |
|-------------------------|-------------------------------------|----------------------------------------------------------------------------------|
| Flow Name               | Standard laptop task                | User-visible name in Flow Designer                                               |
| Internal Name           | standard_laptop_procurement         | Unique API / Machine identifier                                                  |
| Application Scope       | Global ( <code>global</code> )      | Application container scope                                                      |
| Run As                  | System User ( <code>system</code> ) | Ensures execution bypasses user permission hurdles                               |
| Trigger                 | Service Catalog                     | Subscribed to <code>sc_req_item</code> catalog submissions                       |
| Action                  | Create Catalog Task                 | Generates <code>sc_task</code> linked to the triggering <code>sc_req_item</code> |

|                   |                                                |                                        |
|-------------------|------------------------------------------------|----------------------------------------|
| Assignment Group  | Hardware<br>(287ebd7da9fe198100f92cc8d168155a) | Auto-routes task to hardware engineers |
| Short Description | Laptop need to Configured                      | Standardized task title                |
| Description       | Laptop need to Configured                      | Standardized task description          |
| Approval Status   | Approved                                       | Pre-approves task initiation           |
